EVERNEW AMERICA Titanium Cookware

Evernew Inc. has been making titanium cookware for 15 years. Titanium is the ultimate material for use in backcountry travel. Not only is titanium exceptionally versatile, it's also lightweight like aluminum, stronger than stainless steel, and fully corrosion-resistant.

Evernew uses a non-Teflon, silicon based ceramic coating and does not use PFOA in the coating. PFOA, Perfluorooctanoic acid, is used in the production of Teflon. Little is known about PFOA, but what is known raises strong concerns regarding human health - especially the effects on children. Seven major manufacturers of Teflon coatings agreed in January 2006 to discontinue the use of PFOA by 2015.
